Portfolio:
www.davidrobert.computer

Creative Technologist with expertise in Creative / Generative AI and interactive design. I translate emerging technologies into compelling experiences that inspire and engage audiences. I think about how we live with technology & how technology lives with us. I have worked in art studios & tech teams & research labs & my own practice, working with cross-disciplinary teams to employ emerging tech for creative & interactive experiences. This has given me a strong vision on what technology is to us today and what it should be tomorrow - ranging across screens, the web, AR, robotics, whole-body interfaces, and just about anything else.

Experience

Creative Technologist (R&D)
Antimodular Research Inc.,
Atelier Lozano-Hemmer
Montreal QC
November 2023 - September 2024
January 2025 - Present

- Led the integration of AI, computer vision, and generative systems into large-scale public installations, enabling thousands of visitors worldwide to interact with new technologies in real time.
- Built custom pipelines (Python, JavaScript, TouchDesigner, Arduino, ComfyUI) to power live audience engagement, ensuring complex AI systems were reliable and responsive at scale.
- Championed studio-wide adoption of AI workflows, introducing generative image/text systems, real-time manipulation, and multimodal analysis. Also integrating AI productivity tools for production pipelines including coding, planning, and 3D assets.

Media Artist in Residence
Fabbrica Research Centre
Treviso TV, Italy
September 2024 - December 2024

- Developed an interactive installation combining real-time generative audio (voice cloning) with TouchDesigner and Python, exploring Human responses to AI presence.
- Collaborated across disciplines in a fast-paced residency environment, producing experimental prototypes that bridged art, design, and emerging AI research.

Creative Technologist / Lab Assistant
Design + Technology LAB,
Toronto Metropolitan University
Toronto ON
September 2021 - April 2022
September 2022 - April 2023
September 2023 - November 2023

- Assisted in day-to-day operations of the lab, including maintenance and operation of lab equipment. This includes 3D printing, laser cutting, XR, and robotics.
- Created an interactive installation for DesignTO 2022 using TouchDesigner, OpenVR, a KUKA robot arm, and full-stack web development.

Research Assistant [AI]
Technology Research in Performance Lab,
Toronto Metropolitan University
Toronto ON
September 2022 - April 2023

- Researched human–AI co-performance, building experimental systems that merged live theatre with generative AI.
- Built a real-time improvisation system using Whisper, GPT-3, and Google Cloud TTS, serving as an early prototype of interactive dialogue with AI in public performance.

Education

BA in Media Production
Concentration in Digital Media
4.27 / 4.33 GPA
Toronto Metropolitan University
Toronto ON
September 2019 – April 2023

Skills

Programming / Development

- Python
 - PyTorch
- JavaScript
 - Node.js
 - React
 - Three.js
 - p5.js
- ComfyUI
- TouchDesigner
- Unity [C#]
- Unreal Engine [C++ & Blueprints]
- OpenFrameworks / Processing
- Arduino

Fabrication

- 3D printing
- Circuit design
- Laser cutting
- Soldering

Teaching Assistant [Physical Computing] Toronto Metropolitan University Toronto ON September 2022 - December 2022	- Assessed students and gave feedback on projects for RTA 321: Intro to Tangible Media. - Supported students with Arduino programming and simple circuit design.	Publications
Creative Developer Intern Jam3 Toronto ON May 2022 - August 2022	- Built a browser-based 3D demo (Three.js, React, Node, MongoDB) showing how small businesses could interact with the Metaverse. Delivered as a client-facing prototype. - Worked in a fast-paced, autonomous intern team of developers, designers, and coordinators.	David Bouchard, Cintia Cristia, David Robert, Michael Bergmann. 2022. Augmented Symphony: An augmented reality application for immersive music listening. In <i>Proceedings of EVA London 2022</i> . Computer Arts Society, London, England, UK.
Research Assistant [AR] Toronto Metropolitan University Toronto ON July 2021 - April 2022	- Developed an AR app using Unity [C#] centred on enhancing digital delivery of orchestral music through spatial and interactive audio. - Co-authored peer-reviewed paper accepted to EVA London 2022.	Exhibitions
Unpaid & Educational Experience		David Robert. I SURRENDERED MY BODY AND I SUCCUMBED TO THE BEAST.. At <i>Until the Very End</i> . Treviso, Italy. <i>Contribution: Artist</i>
Undergraduate Researcher [Unreal & Networking Developer] Synaesthetic Media Lab, Toronto Metropolitan University Toronto ON September 2022 - December 2022	- Collaborated with a joint university research team to prototype interactive, networked “boat-drones” for live performance environments. - Designed and programmed a simulation environment in Unreal Engine 5 (C++) and built real-time communication systems (Python server, WebSockets, I2C) to synchronize physical and virtual performance elements.	Rafael Lozano-Hemmer, Antimodular Research Inc. 2024. Translation Island. At <i>Manar Abu Dhabi</i> . Abu Dhabi, UAE. <i>Contribution: Exhibition Technician.</i>
Interactive Developer Ontario Science Centre Toronto ON January 2022 - April 2022	Designed and delivered a projection-based audio installation that engaged families and children, turning abstract tech into playful, intuitive interaction. Ensured robustness for constant public use at scale.	David Robert, Alex Verni, Design + Technology LAB. 2022. Assembly Line. At <i>DesignTO 2022</i> . Toronto, Canada. <i>Contribution: Lead Developer and Designer.</i>
Code Coach Toronto Metropolitan University Toronto ON September 2021 - April 2022	Helped students fix issues in their creative coding projects and tutored them on core programming concepts.	David Robert, Alex Verni, Stacy Cernova, Anthony Baloukas. 2022. Moth Melody. At <i>Ontario Science Centre</i> . Toronto, Canada. <i>Contribution: Lead Developer.</i>
Undergraduate Researcher [Unreal AR Developer] Synaesthetic Media Lab, Toronto Metropolitan University Toronto ON January 2021 - April 2021	- Designed and developed an AR HoloLens 2 application in Unreal Engine 4 [Blueprints]. - The app supports training for medical workers through the manipulation of medical models with gestures and tools.	
Fabrication Technician Philip Beesley Studio, Living Architecture Systems Group Toronto ON February 2020 - March 2020	Fabricated components for an interactive installation that was part of the 2021 Venice Biennale of Architecture.
